CLIMBING CENTER

Bad Tölz

German Haimerl Architekten designed the Bad Tölz climbing center using the building shell of a former heating station, setting new standards for the area of indoor climbing. The climbing center is one of Germany's largest and most modern facilities.

In addition to an impressive 1400 m² of climbing surfaces with routes of up to 25 meters – 350 m² of it outdoors – it offers a 280 m² bouldering room, a bistro area and naturally, since it is located in the middle of the Bavarian Alps, a spacious beer garden.
