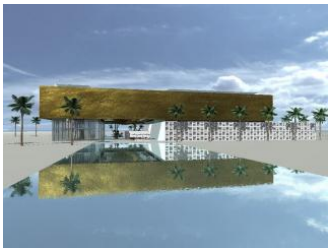
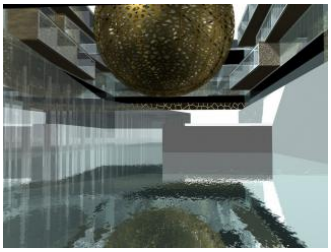
German Medical Center

Sharjah, VAE





The continuing boom in the Persian Gulf has long since grown beyond the metropolis of Dubai.
The neighboring emirates in particular are catching up, following the model set by Dubai.

As the region becomes more prosperous, demand for the latest Western-style medical care is growing. Particularly our specialized experience with the private health care market, which sets high standards for architectural design and professional execution, makes German Haimerl Architekten a popular partner in the region – and not just in the health-care sector.
