New Broadcasting Center Construction for Hit Radio FFH Bad Vilbel

Hit Radio FFH is one of the largest private radio stations in Germany. Since the broadcasting center in Frankfurt-Rödelheim, designed by German Haimerl Architekten in 1989, no longer met the needs of the successfully expanding radio station, the management decided to build a new center in Bad Vilbel near Frankfurt am Main.

German Haimerl Architekten submitted an innovative planning concept that won out in the peer review process, and were awarded the contract to plan the building's architecture as well as its interior design, from studios to studio furnishings, which included the latest digital broadcasting technology.
