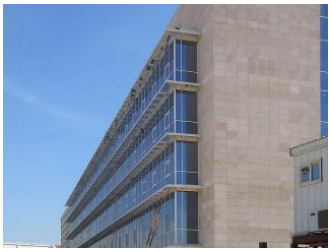
OMOOMA - PRIVATE HOSPITAL for Women and Maternity

KUWAIT City



The “OMOOMA PRIVATE HOSPITAL for Women, KUWAIT City” was developed and planned by German Haimerl Architekten as the general planner. German Haimerl Architekten led the team of international planners and consultants.

It was a challenging task that would have been impossible without modern communication tools. In particular, our proprietary COLLABORATION portal allowed the widely distributed planning team to exchange planning documents and information online.

The hospital started operations in 2008.
