## Palliative Care Center

University hospital in Munich

German Haimerl Architekten created extensive visual materials in order to illustrate our vision for the pediatric palliative care center and to help it collect donations. Computer animations let viewers experience this ambitious project long before the groundbreaking ceremony.

We are pleased to have been chosen as the architects for this unique project, to help make this important project a reality – allowing terminally ill children to say goodbye with dignity, and surrounded by their loved ones. Founded the HOMe project in 2004 – the coordination office for pediatric palliative medicine (KKiP) at the hospital of the University of Munich.
