Pediatric palliative care center in Munich

**Language** English

Dear Mr. Haimerl,

collaborating with you and your office on the ongoing plans for the pediatric palliative care center in Munich, in Großhadern, was and is a great source of pleasure. After many years of experience, we can safely say we have never had the privilege of working with an architecture office that pairs such outstanding specialized and technical skills with such unusual sensitivity to the specific needs of their respective clients.

We want to thank you for your help and support in planning the pediatric palliative care center so far, and we look forward to the shared realization phase.

Best wishes,

Prof. Dr. Gian Domenico Borasio Prof. Dr. Monika Führer
