Rheumazentrum Oberammergau

New replacement building for acute care facility

The rheumatism center in Oberammergau is part of the Waldburg-Zeil company, which operates specialized health facilities all over Germany. The center in Oberammergau, which focuses on treating rheumatism patients, offers acute care and rehabilitation facilities. The acute care facilities – currently spread out among several buildings – will be combined in a new building that connects to the existing building structures.
The new building will include doctors' offices and examination rooms on the ground floor, and three inpatient wards with 30 beds each on the floors above them.
